

## NOTE FROM THE DIRECTOR:

As the Executive Director, it is my pleasure to welcome you to our organization. We are delighted you have chosen to learn more about who we are and what we do. The Learning Community of PA Inc. was founded and built on Person Centered Thinking philosophy and principles. This is a philosophy that puts the person we support first and foremost in helping them to create a plan to live the life they want to live.

Our mission: **To promote growth and discovery while supporting the value each person brings to our community.** I am honored to be a part of such a forward thinking provider agency.

As our name suggests, with every person we support, we continue to **learn** and to strive to create and provide quality services. Thank you to our board, dedicated support professionals, fellow agencies, families, and especially to those we support for keeping us moving forward and challenging us to better ourselves.

Thank you for taking the time to learn more about us, I hope you will also enjoy a glimpse of our organization through our newly updated website at [www.TLCOFPA.org](http://www.TLCOFPA.org).

Sincerely,

*Elise Messner*
